如何正確回收紙包?

How to recycle beverage carton correctly?

1 移除及剪開

Strip & Cut

2 揭開及清洗

Unfold & Wash

3 壓扁

Flatten

4 回收

Return for recycling

乾淨紙包回收 Q&A

Carton Clean Recycling

為甚麼要回收紙包？

Why carton should be recycled ?

因為紙包飲品盒內含可再生的紙板、塑膠及鋁箔，回收後可循環再造新物料，實現循環經濟。

Carton is made of paper, plastic and aluminum. All these materials can be recycled to make different products and that will help promote a circular economy.

為甚麼要乾淨回收？

Why carton being recycled must be clean ?

在回收紙包前先沖洗，可以減低回收商的工作，增加回收價值。

Rinsing and cleaning cartons before recycling can reduce workload of recycler and improve recycling efficiency.

為甚麼要分開回收飲管？

Why the straw must be recycled separately ?

因為飲管與紙包飲品盒所含的塑膠不同，分開回收能減少回收後的分類工序。

The straw is made of a different plastic which should be recycled separately. Removing the straw from carton can help shorten the recycling process.
